Professor Fatou GUEYE
TALL

Dear Prof. Tomris Ozben,

It is with great satisfaction that we acknowledge the official notification of the Senegalese Society of Clinical Biochemistry's acceptance into the IFCC, following its unanimous approval by its members through a postal vote.

It is a great honor for us to join your federation, which embodies values that we fully share.

This membership represents an important milestone and we are committed to contributing to the federation's activities as well as its shared goals.

We remain at your disposal for all upcoming formalities, and we look forward to collaborating with all the members.

We would also like to share that, following a general shareholder's meeting held on April 16th 2025, I now have the honor of serving as the new president of the Senegalese Society of Clinical Biochemistry. I look forward in this new capacity to engaging actively with the IFCC and strengthening our collaboration.

Yours Sincerely,

2SBC President

Docteur Philomène Lopez SALL
Professeur des Universités
